

# SINGLE SERPENTINE WATER HEATER

## Single Serpentine Water Heater

These water heaters, that are produced according to European Standard(EN 12897), are double enamel coated and they are used especially in villas, hotels, restaurants, factories. They can be used also every buildings that need hot water. They are used by connecting to a boiler or a solar collector.

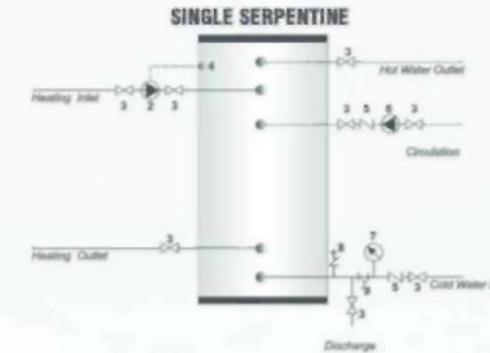

### Technical Features

- Capacity between 100 - 3000 lt.
- Hygienic because areas, that come into contact with water, are double enamel coated.
- 50 mm. Polyurethane insulated at the capacity between 100 - 600 lt. , special sponge insulated at the capacity between 800 - 3000 lt.
- Electrostatics powder painted cover on galvanized plate at the capacity between 100 - 600 lt. , special winlex cover at the capacity between 800 - 3000 lt.
- Cathodic protection
- High efficiency
- Electrical resistance as optional
- Esthetic appearance
- 10 bar operating pressure

# ELECTRICAL WATER HEATER

## Electrical Hot Water Heater

These electrical water heaters, that are produced according to European Standard (EN 12897), are given preference in areas which don't have the source of heating liquid to respond hot water demand by using electric energy.

The security of electric control panel in this product is upgraded to maximum level. In the electric control panel, mainly there are fuse, contact, thermostat of security and operation, on/off switch and the relay of contact fault stream.

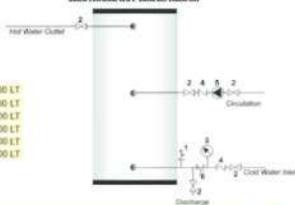

Moreover, different capacities and electric power of this product can be made also by using security valve that is sensitive to temperature and pressure as optional.

### Technical features

- Capacity between 100 - 3000 lt.
- Hygienic because areas, that come into contact with water, are plated with two coats of enamel...
- 50 mm. Polyurethane insulated at all capacities.
- Electrostatics powder painted cover on galvanized plate at all capacities.
- Cathodic protection.
- High efficiency.
- Rustless resistances.
- Esthetic appearance.
- 10 bar operating pressure.
